

HOW SUSAN LA FLESCHÉ
OVERCAME RACIAL AND
GENDER INEQUALITY TO
BECOME AMERICA'S FIRST
INDIAN DOCTOR

Susan Le Flesche - Warrior of the People September 21, 6:30 p.m.

On March 14, 1889, Susan La Flesche received her medical degree - becoming the first Native American doctor in U.S. history. She earned her degree 31 years before women could vote and 35 years before Indians could become citizens in their own country. By age 26, this fragile but indomitable Indian woman became the doctor to her tribe.

Overnight, she acquired 1,244 patients scattered across 850 square miles of rolling countryside with few roads. Her patients often were desperately poor and desperately sick - tuberculosis, small pox, measles, influenza - families scattered miles apart, whose last hope was a young woman who spoke their language and knew their customs.

Author Joe Starita will be present to discuss his book: **A Warrior of the People: How Susan La Flesche Overcame Racial and Gender Inequality to Become America's First Indian Doctor.**
