DECODING

the Weather Machine

Tuesday, July 10
6 p.m.

Disastrous hurricanes. Widespread droughts and wildfires. Withering heat. Extreme rainfall. It is hard not to conclude that something's up with the weather, and many scientists agree. It's the result of the weather machine itself—our climate—changing, becoming hotter and more erratic.

Join us at the La Vista Public Library for a free screening of this NOVA documentary, which cuts through the confusion around climate change, while working to better understand the workings of the weather and climate machine we call Earth.

Light refreshments will be provided. All ages are welcome.
