RECOMMENDATION

Approval

BACKGROUND

As we continue to address the City’s aging infrastructure, funding has been earmarked over the next several years of the Capital Improvement Program (CIP) to facilitate a significant amount of street rehabilitation work throughout the City. In order to prioritize the use of those funds in the most effective and efficient manner, a comprehensive analysis of the current condition of the City’s road infrastructure is needed.

Although there are various methods for doing pavement analysis, most use a visual inspection process. Lamp Rynearson partners with Stantec (from the KC metro area), a company that will drive all of the City streets using a sophisticated data collection van. This van utilizes high definition cameras, laser road imaging systems, and profile sensors to capture large amounts of data regarding the current condition of the road surface. This data is then analyzed by Lamp Rynearson and all City streets are rated on a pavement condition index (PCI) of 0-100. This rating system can then be used to provide objective recommendations to the City Council on how funds dedicated for street improvements can best be utilized. Also during this process, the van will capture an inventory of street related assets such as street signs, pavement markings, traffic signals, storm water inlets and manholes which, in addition to being valuable information, can also be incorporated into the GIS system.

There are a limited number of firms that provide this type of comprehensive data collection system. Because the City of Papillion has also partnered with Lamp Rynearson/Stantec to do this work in the spring, our contract price reflects a savings in mobilization charges as a result.
RESOLUTION NO.

WHEREAS, the City Council of the City of La Vista has determined that the collection of pavement assessment data and street related asset data are necessary; and

WHEREAS, the FY 19/20 Biennial Budget includes funding for these services; and

WHEREAS, the agreement has a not-to-exceed cost of $69,065.95 for the scope of services;

In the event Lamp Rynearson or any other party encounters asbestos or hazardous or toxic materials at the jobsite or any adjacent areas that may affect the performance of Lamp Rynearson’s services, Lamp Rynearson may, at its option and without liability for consequential or any other damages, suspend performance of services on the project until the Client retains appropriate specialist consultant(s) or contractor(s) to identify, abate and/or remove the asbestos or hazardous or toxic materials, and warrant that the jobsite is in full compliance with applicable laws and regulations.

**Miscellaneous:** If the Client issues a Purchase Order of which this Abbreviated Agreement becomes a part, the terms of this Agreement will take precedence in the event of a conflict of terms. Lamp Rynearson makes no warranty, express or implied, to Client with regard to its services or the results to be obtained from the same.

The EJCDC No. E-500 Agreement shall be furnished by Lamp Rynearson to Client upon request. In the event of any conflict between the terms of that document and this Agreement, this Agreement shall control.

**Governing Law:** In the event that any part of this document is held invalid by any court, the remainder of the Agreement shall remain in full force and effect. This document shall be governed by the laws of the State of Missouri.

**Amendments:** This Agreement and documents incorporated herewith constitute the entire agreement of the parties and supersedes all prior negotiations and representations.
