**Zoning Ordinance Amendment—  
Sections 2.20, 7.01, and 7.03 (Signs)**

# MEMO

**TO:** Planning Commission

**FROM:** Cale Brodersen, Assistant Planner

**DATE:** 6/18/2020

**RE:** Public Hearing regarding text amendments to the Zoning Ordinance – Sections 2.20, 7.01, and 7.03 (Signs)

---

Staff have recently received several inquiries regarding the use of currently prohibited sign types. Staff are proposing zoning text amendments which creates several new sign types and the appropriate circumstances for their use, provides further clarification and cleanup for the requirements and definitions of several existing sign types, and exempts signs for public school facilities from the signage requirements. The primary proposed changes to the signage regulations include:

- Allows for the use of blade signs on multi-story buildings in the Mixed-Use City Centre Zoning District for the following uses: event centers, meeting halls, or public facilities. A blade sign is a type of projecting sign that is particularly effective in areas with heavy foot traffic.
- Provides for the ability to place roof signs that advertise an entire district or development, in addition to a building or use in the Mixed-Use City Centre Zoning District. Roof signs can be helpful in creating a cohesive identity and sense-of-place for a development or district, and would match the overall design style of the Mixed-Use City Centre District well.
- Allows for the use of marquee signs for event centers, meeting halls, or public facilities in the Mixed-Use City Centre District. Marquee signs are a stylized sign type commonly used for theaters and event centers to advertise show times and events, and would be appropriate in the pedestrian-oriented Mixed-Use City Centre District.
- Clarifies that signs for public school facilities are exempt from the signage requirements of the La Vista Zoning Ordinance. Under the current Zoning Ordinance, public schools in residential districts are not able to have wall signs or electronic message boards for ground-monument signs that can help

communicate important information to parents or guardians like dates for school closings or events. Signs for public facilities or public/civic events are currently exempt from the signage requirements, and staff conclude that it would be appropriate for public school facilities to be included in this exemption along with public facilities.

Overall, staff believes that the proposed amendments to the signage regulations of the Zoning Ordinance will provide for greater flexibility in the choice of signage types without negatively impacting overall urban design with an overabundance of advertising message.

A redlined copy of the proposed amendments is attached.

**STAFF RECOMMENDATION:**

Staff recommends approval of the proposed zoning text amendment.

## ARTICLE 7: SUPPLEMENTAL REGULATIONS

### Section 7.01 Sign Regulations

#### 7.01.01 **Purpose**

The purpose of these sign regulations are: to encourage the effective use of signs as a means of communication in the city; to maintain and enhance the aesthetic environment and the city's ability to attract sources of economic development and growth; to improve pedestrian and traffic safety; to minimize the possible adverse effect of signs on nearby public and private property; and to enable the fair and consistent enforcement of these sign regulations. These sign regulations are adopted under the zoning authority of the city in furtherance of the more general purposes set forth in the zoning ordinance.

#### 7.01.02 **Applicability**

A sign may be erected, placed, established, painted, created, or maintained within the city and the city's extraterritorial zoning jurisdiction only in conformance with the standards, procedures, exemptions and other requirements of these sign regulations.

#### 7.01.03 **Definitions and Interpretation**

Words and phrases used in this ordinance shall have the meanings set forth in Section 2. Principles for computing sign area and sign height are contained in Section 7.01.04.

#### 7.01.04 **Computations**

##### 1. *Computation of Area of Individual Signs*

The area of a sign face (which is also the sign area of a wall sign or other sign with only one face) shall be computed by means of the smallest square, circle, rectangle, triangle, or combination thereof that will encompass the extreme limits of the writing as a whole, representation, emblem, or other display as a whole, together with any material or color forming an integral part of the background of the display or used to differentiate the sign from the backdrop or structure against which it is placed, but not including any supporting framework, bracing, or decorative fence or wall when such fence or wall otherwise meets zoning ordinance regulations and is clearly identical to the display itself.

##### 2. *Computation of Area of Multi-faced Signs*

The sign area for a sign with more than one face shall be computed by adding together the area of all sign faces visible from any one point. When two identical sign faces are placed back to back, so that both faces cannot be viewed from any point at the same time, and when such sign faces are part of the same sign structure and are not more than forty-two (42) inches apart, the sign area shall be computed by the measurement of one of the faces.

##### 3. *Computation of Height*

The height of a sign shall be computed as the distance from the grade at the base of the sign, or from the grade immediately below the sign in the case of Wall Signs, at normal grade to the top of the highest attached component of the sign. Normal grade shall be construed to be from finished grade. Any berms shall be construed to be a part of the sign base and added to the overall height of the sign.

6. ***Project Directory Signs (Ordinance No. 1145, 5-17-2011)***

*In order to maintain the flow of traffic on arterial and collector roads and to promote vehicular safety, emphasis is made to limit the number of ingress and egress points off of such roads. Project directory signs are intended to direct attention to planned multi-tenant developments which are not easily accessible off of such roads and where on-premise signage for that development (or any tenants within the development) would not otherwise be visible by the motorists traveling on nearby arterial or collector roads at the closest point of access. Provisions are provided to allow project directory signs which identify the name of the particular development and/or the names of their tenants. Such signs would be supplemental to signage otherwise provided for such developments.*

*Directional signs may be erected under the following conditions:*

- A. Access to the development is restricted. Full ingress and egress to the development off an arterial or collector road is limited by access constraints or non-existent.
- B. Such signs may be placed on or off-premises. All such signs shall be constructed and located, however, so as to be visible by the motorist traveling on the arterial or collector road which intersects with the local road providing access to the development.

- D. A maximum of two project directory signs per development shall be allowed. No two signs shall be allowed closer than five-hundred (500) feet to each other on the same side of the street, measured along the edge of the street.
- E. No such sign shall be allowed further than one-thousand (1,000) feet from any entity advertising on the sign using the closest straight line measurement.
- F. The minimum distance between a sign location and any residential zoning district shall be 50 feet.
- G. The sign may contain the name of the development, names of tenants within the development, directional arrows and distance information. If off-premises, sign shall identify multiple businesses or industries.
- H. The size of each sign shall be a function of the number of tenants within the development. Each eight (8) square feet per principal use within the development, whichever is greater, with a maximum area of eighty (80) square feet.
- I. All such signs shall be a ground-mounted, monument-style sign.
- J. Such signs shall be subject to the design standards of the PUD or Gateway Corridor Overlay District, if within such district.
