BACKGROUND

The current easement machine is a 1999 model that is co-owned with the City of Papillion. The current machine is rubber-tired and is too heavy. Since it is typically used on the golf course and other outlot areas with slopes it is susceptible to tipping over. The current technology utilizes rubber tracks instead of tires and this particular vendor offers extendable tracks which greatly improve stability and the ability to work in soft soil conditions.

The machine is proposed to be purchased based on proposals made to the National Joint Powers Alliance (NJPA), contract number 022014-SCA. The NJPA operates just like the state bid process, but on a much larger scale at the regional and national level. The Sewer Equipment Company of America is the manufacturer of the easement machine and this is the manufacturer that provided our sewer jet truck. Therefore, operating controls and various equipment items are the same.
