BACKGROUND

A public hearing has been scheduled to consider a conditional use permit (CUP) and the Final PUD Plan applications submitted by Nelson Construction & Development on behalf of the property owner, L & B Properties, LLC, for approximately 6.29 acres platted as Lot 2, Mayfair 2nd Addition Replat Five. The project is located on the southwest corner of Brentwood Drive and 97th Plaza.

The City Council held a public hearing on June 16, 2015 and approved an amendment to the Future Land Use Map of the Comprehensive Plan from Commercial to High Density Residential; and a Zoning Map Amendment from C-1, Shopping Center Commercial, with the Gateway Corridor District (Overlay District) to R-3 PUD, High Density Residential Planned Unit Development, with the Gateway Corridor District (Overlay District). The Planning Commission held a public hearing on July 16, 2015 and recommended approval of a Preliminary PUD Site Plan to City Council. The City Council held a public hearing on August 18, 2015 and approved of the Preliminary PUD Site Plan. The Planning Commission held a public hearing on August 20, 2015 and unanimously recommended approval of a Conditional Use Permit to City Council.

The applicant proposes to construct and operate a continuing care retirement community, with 25 units (31 beds) for independent living, 50 units (62 beds) for assisted living, and 24 units (28 beds) for memory care. The project also includes indoor and outdoor common areas.

A detailed staff report is attached.

The Planning Commission held a public hearing on August 20, 2015 and unanimously recommended approval of a Conditional Use Permit to City Council (the Final PUD Plan does not go to the Planning Commission if it is consistent with the Preliminary PUD Plan as approved by the City Council).

C. RELEVANT CASE HISTORY:

1. The City Council held a public hearing on June 16, 2015 and unanimously approved of an amendment to the Future Land Use Map of the Comprehensive Plan from Commercial to High Density Residential; and a Zoning Map Amendment from C-1, Shopping Center Commercial, with the Gateway Corridor District (Overlay District) to R-3 PUD, High Density Residential Planned Unit Development, with the Gateway Corridor District (Overlay District).
2. The Planning Commission held a public hearing on July 16, 2015 and unanimously recommended approval of a Preliminary PUD Site Plan to City Council.
3. The City Council held a public hearing on August 18, 2015 and unanimously approved of the Preliminary PUD Site Plan.
4. The Planning Commission held a public hearing on August 20, 2015 and unanimously recommended approval of a Conditional Use Permit to City Council.

D. APPLICABLE REGULATIONS:

1. Section 5.08 of the Zoning Regulations – R-3 High Density Residential District
2. Section 5.17 of the Zoning Regulations – Gateway Corridor District (Overlay District)
3. Section 5.15 of the Zoning Regulations – Planned Unit Development District
4. Article 6 of the Zoning Regulations – Conditional Use Permits

III. ANALYSIS

A. COMPREHENSIVE PLAN:

1. The Future Land Use Map of the Comprehensive Plan currently designates this property for High Density Residential.
2. The proposed project will meet Action Strategy #12 of the Housing and Residential Areas category of the Community Goals, Policies and Action Strategies Chapter of the Comprehensive Plan, which states:
Encourage the development of additional owner and renter occupied housing types, including single family, multiple family for low- to moderate income families, persons with disabilities and the elderly, to meet existing and future needs of

all La Vista residents. Emphasis on owner occupied housing development is the preferred choice of the community and its residents.

La Vista has only one nursing care and assisted living facility. The proposal would provide an additional option for residents.

B. OTHER PLANS: N/A

C. TRAFFIC AND ACCESS:

1. Access will be from proposed egress / ingress to Brentwood Street and South 97th Plaza. The traffic impacts from a high-density residential use are expected to be less intensive than most commercial uses.

D. UTILITIES: All utilities are available to the site.

E. PARKING REQUIREMENTS: The parking stall requirements, as per the Zoning Ordinance for the proposed use are:

• Independent Living -	31 Stalls (1 Per Bedroom)
• Assisted Living -	50 Stalls (1 Per Unit)
• Memory Care -	10 Stalls (1 Per 3 Beds)
• <u>Employee -</u>	<u>25 Stalls (1 Per Employee)</u>
• Total	116 Stalls (5 Accessible)

The developer has submitted a letter requesting a reduction in the parking stall counts required for the proposed use based on recent development as well as historical data from the operating history of similar projects.

Staff has reviewed this letter and approves of the proposed stall count of 92 stalls (4 accessible) based on the developer's experience with parking demand for these uses. If parking issues arise, it appears as though space for additional parking stalls is available along the southern lot line if necessary. Overflow parking is not allowed on Brentwood Drive or 97th Plaza.

The Preliminary PUD Site Plan that was approved by City Council allows for this reduction in required parking.

F. LANDSCAPING: The property is within the Gateway Corridor Overlay District – Sub Area Secondary Overlay and is subject to design review. Also, an existing permanent 30-foot wide landscape buffer easement lies along the northern edge of the Mayfair commercial area. This easement is depicted in the northwest corner of the property on the CUP Site Plan map.

A landscaping plan has been reviewed and approved by the Design Review Architect. A copy of this plan is included as an exhibit to the Conditional Use Permit.

IV. REVIEW COMMENTS:

1. As the subject property is within the Gateway Corridor District and is subject to the Architectural and Site Design Guidelines for the Mayfair Commons Development, any development on the property will need to go through the City's building and site design approval process. The development has received approval by the Design Review Architect. The resulting building design documentation has been included within the CUP as an exhibit.

V. STAFF RECOMMENDATION – FINAL PUD SITE PLAN:

Staff recommends approval of the Final PUD Site Plan.

VI. STAFF RECOMMENDATION – CONDITIONAL USE PERMIT:

Staff recommends approval of the Conditional Use Permit, contingent on legal review and approval of proposed changes to the CUP.

VII. PLANNING COMMISSION RECOMMENDATION – CONDITIONAL USE PERMIT:

The Planning Commission held a public hearing on August 20, 2015 and unanimously recommended approval of the Conditional Use Permit contingent on the finalization of the landscaping plan prior to City Council review of the Conditional Use Permit.

RE: Conditional Use Permit, Preliminary PUD & Final PUD – Initial Review
Good Neighbor Senior Living Facility
Lot 2, Mayfair 2nd Addition Replat Five

Chris:

I have reviewed the documents that you provided to me for the above-referenced applications in your transmittal requesting comments by June 16, 2015. Based on the elements set forth in Sections 6.05 and 5.15 of the Zoning Regulations, I have the following comments:

Conditional Use Permit

1. In regards to Article 6.05.03, I find no impact to the “orderly development of surrounding property” subject to consideration of a pedestrian connection along the southerly edge of the site for connection to the vacant property to the west and reservation of a right for a vehicular ingress/egress easement at the northwest corner of the site to benefit Lot 11A, Mayfair 2nd Addition, Replat 1 if future development plans on that parcel indicate that such access would be appropriate.
2. In regards to Articles 6.05.05 and 6.05.10, concerning traffic congestion, the proposed use of 99 living units for various levels of senior living will have less traffic impact than the previous commercial zoning of the property. For that reason, I do not find that a traffic impact study is necessary. Further, the City recently conducted a traffic signal study on 96th Street which showed that warrants are just barely met for a signal at 96th and Brentwood. This project would provide some additional traffic to further justify the signal. A CIP request has already been made based on the signal study to program a signal

at that intersection. The width of paving in Brentwood Drive is sufficient to stripe a left-turn bay into the proposed entrance onto Brentwood at the northwest corner of the site. I do recommend that the proposed access on Brentwood Drive be offset as much as possible from the intersection of Brentwood and 97th Circle.

3. In regards to Article 6.05.09 there needs to be significant landscaping of a buffer to residential lots to the north. A 30 feet wide landscape buffer easement was recorded over the 30 feet of the property directly abutting the single family lot in the northwest corner of the site. A copy of the easement should be obtained and reviewed for any details that may be applicable. Moving the driveway as noted above in Item 2 would provide additional buffering space.

Preliminary PUD

4. In regards to Article 5.15.04.01, did the applicant provide a construction schedule?
5. In regards to Article 5.25.04.02, there are not any additional public improvements required. However, I recommend that the applicant be provided with a copy of the executed subdivision agreement for Mayfair 2nd Addition Replat Five with exhibits. There are shared private infrastructure improvements that were to benefit this property. In particular, this was the storm sewer system built up to the southwest corner of the site.
6. In regards to Article 5.15.04.03 the proposed access drive at the northwest corner of the site should be paved with 7-inch thick Portland cement concrete pavement down to the north line of the proposed parking garage. See Comment 1 above for further discussion supporting this recommendation. Also, the proposed access drive onto 97th Plaza is shown with a proposed grade in excess of 8 percent. This seems excessive especially in view of the type of users of this facility. I recommend that options be explored. Significant retaining walls are also proposed.
7. In regards to Article 5.15.04.06 I recommend that a sidewalk for pedestrian access across the south edge of the site connecting 97th Plaza to the undeveloped property to the west be included in the plan. Also, in regards to this item, please refer to Comment 2 above concerning relocation of the proposed access at the northwest corner of the site.
8. In regards to Article 5.15.04.07, the applicant needs to justify the reduction in quantity of garage parking stalls below that required by Article 7.05.08 of the zoning regulations which is 0.5 stalls per unit.
9. In regards to Article 5.15.04.14, the requirement for shared accesses onto a collector street, if this used is considered a commercial activity, is fulfilled if an easement reservation is provided over the access proposed at the northwest corner of the site onto Brentwood Drive.
10. I assume that Articles 5.15.04.18 through 5.15.04.21 will be addressed by other City staff more qualified to comment on those items.
11. In regards to Article 5.15.05.02.04, a pedestrian sidewalk is shown along 97th Plaza but both connectors into the site have proposed steps shown. At least one of these needs to be an ADA accessible access.
12. In regards to Article 5.15.05.02.07, the applicant needs to advise if the project is going to be phased and identify boundaries of each phase is applicable.

13. In regards to Article 5.15.05.04, the plan shows a proposed storm and sanitary sewer layout which are conceptually satisfactory. The applicant should be aware that making the sanitary sewer connection across the existing storm sewer in 97th Plaza will be difficult due the relative elevations of each of the sewer lines. Also, the storm sewer plan needs to show a connection to the existing storm sewer that was stubbed out to the south line of this lot. Refer to the subdivision agreement and exhibits for more information. A copy of the drainage study and storm sewer plan can be provided.
14. In regards to Article 5.15.05.05, please include the lot dimensions on Sheet C1.0.

Final PUD

15. In regards to Article 5.15.06.01.01, a final plat is not required. However, a final site plan addressing the comments made in the foregoing items will be needed.

Please contact me if you have questions about my comments. Please submit revised materials to me for additional review.

PRODUCT INFORMATION

Designed for steep, sloping hillsides and other structural challenges, the Vertica Pro[®] retaining wall system can be built to virtually any height in incredibly tight spaces – thanks to an impressive 4-degree batter, built-in alignment locators, and a near-vertical rise for less excavation and land loss. Typically used with geosynthetic reinforcement, Vertica Pro blocks meet or exceed industry standards for strength and durability.

- Pinless, patented locator lug gives quick, uniform setback for reduced labor costs
- Used in commercial-site development or anywhere space is at a premium
- Warm earth-tone colors and rugged, rock-like texture
- For gravity wall applications, the Vertica Pro system, with its deeper design, can accommodate walls up to approximately 6 feet high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex[™] retaining wall system when designed by a qualified engineer

Straight Face

- Minimum outside radius, measured on the top course to the front of the units: 8 feet, 6 inches
- Minimum inside radius, measured on the base course to the front of the units: 5 feet, 6 inches

Beveled Face

- Minimum outside radius, measured on the top course to the front of the units: 5 feet, 6 inches
- Minimum inside radius, measured on the base course to the front of the units: 8 feet

*This height assumes cores and insets are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.
